Specification

The abstract of the disclosure is objected to as not adequately describing the invention. It does not state that the invention is a blind. Also, the term "level" does not appear to be appropriately used in the present context. Correction is required. See MPEP § 608.01(b).

The disclosure is objected to because of the following:

The term "level" is not appropriately used in the present context. Also, on page 5, lines 15-16 (marked-up copy), "individual teeth 48-55" is ambiguous since it is not clear that these numbers relate to teeth in the drawings. Also on page 5, the statement that the reflection of light bundle 50 is shown on the upper side of blind 51 is not understood in light of what is shown in the drawings. On page 6, line 2, "retro-reflected ray 56" is ambiguous since "56" shows an arrow, Fig. 4. On page 7, the statement "Contrary to Figures 3 through 6, the underside of the blind is toothed as well" is ambiguous based on what is shown in Figs. 5 and 6, which both appear to have toothed undersides.

Drawings

The drawings are objected to because the objections to the specification discussed above relate to the drawings. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

Claims 1-20 and 22-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The use of the term "level" is questioned. It does not appear that this term is properly used in the present context.

In line 4, "said prism-molded teeth of one prism side" is not understood.

In line 11, "the level of the outer edges" is not understood since two "levels" have been recited and there is no antecedent basis for "the outer blind edges".

In paragraph a), there is no antecedent basis for "said angle of inclination B1" and "B2".

Paragraph b) recites multiple embodiments as evident by the terms "and/or" and "either...or".

Much of paragraphs c) and d) actually recite the behavior of light in conjunction with the blinds, which confuses the scope of the claim between article claims and method-of-using claims. These recitations are considered to limit the structure by reciting that the structure is capable of interacting with light in such a manner.

In claim 2, "readjustment" is recited but no means for such readjustment have been recited.

In claim 6, "at least on first portion" is ambiguous since first portions have already recited in claim 1.

The use of reference numerals to recite an element, such as in claims 1 and 9, is not proper. Reference numerals may only be used as an aid in understanding the invention.

In claim 23, there is no antecedent basis for "said layers of In_2O_2 , SnO_2 and Sb".

It appears that allowable subject matter is present. However, the wording of claim 1 renders the claim sufficiently indefinite such that it is difficult to comprehend. The Examiner will further consider the claims upon amendment.

Conclusion

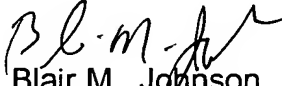

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
